ABSTRACT

In this paper, we describe the formatting guidelines for International Journal for Computer Application and Research (IJFCAR).

Keywords

Keywords are your own designated keywords which can be used for easy location of the manuscript using any search engines.

1. INTRODUCTION

We ask that authors should follow some simple guidelines. In essence, we ask you to make your paper look exactly like this document. The easiest way to do this is simply to download the template, and replace the content with your own material.

2. PAGE SIZE

All material on each page should fit within a rectangle of 18x23.5 cm (7" x 9.25"), centered on the page, beginning 2.54 cm (1") from the top of the page and ending with 2.54 cm (1") from the bottom. The right and left margins should be 1.9 cm (.75"). The text should be in two 8.45 cm (3.33") columns with a .83 cm (.33") gutter.

3. TYPESET TEXT

3.1 Normal or Body Text

Please use a 12-point Times New Roman font or a font as close as possible in appearance to Times New Roman in which these guidelines have been set. The goal is to have a 12-point text, as you see here. Please use sans-serif or non-proportional fonts only for special purposes, such as distinguishing source code text. If Times New Roman is not available, try the font named Computer Modern Roman. On a Macintosh, use the font named Times. Right margins should be justified, not ragged.

3.2 This paragraph is a repeat of 3.1

Please use a 12-point Times New Roman font or a font as close as possible in appearance to

Times New Roman in which these guidelines have been set. The goal is to have a 12-point text, as you see here. Please use sans-serif or non-proportional fonts only for special purposes, such as distinguishing source code text. If Times New Roman is not available, try the font named Computer Modern Roman. On a Macintosh, use the font named Times. Right margins should be justified, not ragged.

3.3 This paragraph is a repeat of 3.1

Please use a 12-point Times New Roman font or a font as close as possible in appearance to Times New Roman in which these guidelines have been set. The goal is to have a 12-point text, as you see here. Please use sans-serif or non-proportional fonts only for special purposes, such as distinguishing source code text. If Times New Roman is not available, try the font named Computer Modern Roman. On a Macintosh, use the font named Times. Right margins should be justified, not ragged.

3.4 Title and Authors

The title (Times new Roman 20-point bold), author's names (Times New Roman 12-point) and affiliations (Times New Roman 10-point) run across the full width of the page – one column wide. We also recommend e-mail address (Times New Roman 10-point). See the top of this page for three addresses. If only one address is needed, center all address text. For two addresses, use two centered tabs, and so on. For three authors, you may have to improvise.

3.5 Subsequent Pages

For pages other than the first page, start at the top of the page, and continue in double-column format. The two columns on the last page should be as close to equal length as possible.

Table 1. Table captions should be placed above the table

Graphics	Top	In-between	Bottom
Tables	End	Last	First
Figures	Good	Similar	Very well

3.6 Page Numbering, Headers and Footers

Do not include headers, footers or page numbers in your submission. These will be

added when the publications are assembled.

4. FIGURES/CAPTIONS

Place Tables/Figures/Images in text as close to the reference as possible (see Figure 1). It may extend across both columns to a maximum width of 17.78 cm (7”).

Captions should be Times New Roman 10-point bold. They should be numbered (e.g., “Table 1” or “Figure 2”), please note that the word for Table and Figure are spelled out. Figure’s captions should be centered beneath the image or picture, and Table captions should be centered above the table body.

Fig 1: If necessary, the images can be extended both columns

5. SECTIONS

The heading of a section should be in Times New Roman 12- point bold in all-capitals flush left. Sections and subsequent sub- sections should be numbered and flush left. For a section head and a subsection head together (such as Section 3 and subsection 3.1), use no additional space above the subsection head.

5.1 Subsections

The heading of subsections should be in Times New Roman 12-point bold with only the initial letters capitalized. (Note: For subsections and sub subsections, a word like *the* or *a* is not

5.1.1 Sub subsections

capitalized unless it is the first word of the header.)

The heading for subsections should be in Times New Roman 10-point italic with initial letters capitalized.

5.1.1.1 Subsubsections

The heading for subsections should be in Times New Roman 10-point italic with initial letters capitalized.

5.1.1.2 Subsubsections

The heading for subsections should be in Times New Roman 10-point italic with initial letters capitalized.

6. REFERENCES

List and number all bibliographical references in 12-point Times New Roman, single-spaced with single-line interlining spacing, at the end of your paper. When referenced in the text, enclose the citation number in square brackets, for example [1]. Where appropriate, include the name(s) of editors of referenced books. Unpublished articles or private communications should not be given in the reference list. Examples are given below for illustrations:
